Good Afternoon \*\*\*\*\*

Further to our conversation earlier this afternoon, after contacting me in relation to card payments in taxis back earlier in the Summer.

I understand that a number of hackney carriage proprietors / vehicle drivers offer both card and cash payments currently, however a number may just accept cash payments.

Is it your position that you want to make it a **mandatory requirement i.e, a must have** facility for a hackney carriage / taxi driver to have the means to accept electronic payments. I just want to understand as this may result in a new business cost to drivers who do not currently have this facility?

Drivers currently have the option to offer card / cash payments should they wish too, if we made it a mandatory requirement, then every vehicle would need to provide this facility. Not sure how you and others would feel if it was made a mandatory requirement? Can you let me know your thoughts on this and whether you would still like to see such a requirement consulted upon with the trade and public?

Kind Regards

Lee Morgan

I do offer the choice off card or cash ,the younger people all pay by phone or card.

Biggest part off my taking are card,

It is also safer, and you don't have a problem off keeping change as the banks are closing down.

Also the hygiene off paying by card.

Some will agree but a few will disagree because off the tax man.

I have a sum up £25.00 /£50.00 depending on where you purchase from the fees are small

My fees are 1.45percent in a £

More payment you take cheaper it works out.

Also it my be worth Mobil catering vans having them payment like this because off the hygiene

Thank you for looking at this

Many thanks
