## 1. INTRODUCTION

- 1.1. The Risk Register identifies key risks that the Pension Fund faces in achieving its objectives. By considering risks and assessing their likelihood and impact the Fund can focus on what action is needed to manage them.
- 1.2. The Risk Register was first compiled and presented to the then Audit and Corporate Governance (Pensions) Sub Committee in February 2012. This annual report aims to update Committee on any changes to the register due to local events and the changing landscape of the pensions world. The Fund's Independent Investment Adviser and Actuary have been consulted and fed their detailed comments into the register presented as Appendix 1.
- 1.3. The Pension Regulator (tPR) says that Public service pension schemes need to have good internal controls. They are a key characteristic of a well-run scheme and will enable risks to the scheme to be managed effectively. tPR goes on to set out that scheme manager (the Fund) must establish and operate adequate internal controls that enable them to manage risks that relate to their scheme and the Fund should have a process to identify, evaluate and manage risks on an ongoing basis. This register is one of the key ways the Scheme manages risks.
- 1.4. The risk register follows the Council's risk management approach and is based on three interlinked principles: resilience, agility, and responsiveness. The risks are categorised under the following headings: Financial, Demographic, Regulatory, Governance and Administration. The updated Risk Register is presented in **Appendix 1**. Members are asked to review the attached register to ensure that:
  - risks are relevant and accurately described
  - all risks are captured and any additional risks are added to the register
  - scores for likelihood and impact are accurate
  - risk treatment is adequate; and
  - scores for residual likelihood and impact are accurate
- 1.5. The ratings scale for impact is set by officers and advisers with confirmation by Committee. The ratings scale for probabilities follows a four-point scoring system. When reviewing the scores Members are asked to pay particular attention to the location of each risk on the risk map, and the associated actions and milestones to those that are high impact and likelihood.

**TABLE 1 – RISK MAP FRAMEWORK**

<b>IMPACT</b>	5	A	A	R	R
	4	A	A	A	R
	3	A	A	A	A
	2	G	A	A	A
	1	G	G	A	A
		1	2	3	4
		>1%	>5%	>10%	>20%
		1 in 100	1 in 20	1 in 10	1 in 5
		rare	unlikely	possible	likely
		<b>PROBABILITY</b>			

1.6. In the above risk map the RAG colours have been taken as follows:

- Red (R) >12
- Amber (A) >2
- Green (G) =<2

1.7. The RAG (Red, Amber and Green) traffic light system shows how important recognised risks are. This is not an indication of Fund performance. Detailed explanations for each score are also included in **Appendix 1** and risks have been ordered red first, then amber and green last (so they are not in risk number order). The main criteria for scoring the risks have been included below:

<b>Likelihood</b>		<b>Impact</b>	
		5	>75% of assets or liabilities affected
4	>20% 1 in 5 - likely	4	>50%
3	>10% 1 in 10 - possible	3	>25%
2	>5% 1 in 20 - unlikely	2	>10%
1	>1% 1 in 100 - rare	1	>2%

1.8. The likelihood, impact and risk factor can be reduced where an appropriate action has been identified to mitigate the risk. The RAG status is given to the risk factor following incorporation of any such identified actions.

## 2. CHANGES TO THE RISK REGISTER

- 2.1. Changes have been 'tracked' so new text or risks are shown underlined in Appendix 1. Scores that have changed are also shown with tracked changes and this helps to identify new changes and shows old text crossed through.
- 2.2. The risk map with some of the higher scoring risks plotted is shown below in Table 2 (5 and over). The closer to the top right-hand corner of the map a risk is, the more important it is to consider and manage.

**TABLE 2 PENSION FUND RISK MAP**

- 2.3. There are no risks that are judged to be 'likely' (a 1 in 5 event).
- 2.4. This year after reviewing the scores in the Risk Map above with the independent investment adviser and actuary similar comments were made that the likelihood of the actuary and investment advice being incorrect should be equally scored given these are professional judgements by established professional firms. Therefore Risk 3, Inappropriate Investment Strategy, and Risk 9, Actuarial Risk, have been moved to the unlikely (1 in 20) column from their previous assessed scores (adjacent boxes). This is demonstrated above in table 2 by arrows showing the direction of travel.
- 2.5. If it is judged that risks have changed from quarter to quarter then this will be reported at the next quarterly meeting, if significant.
- 2.6. Throughout comments have been updated for developments since the last Risk Register in July 2023.

### **3. Responsible Investor Comments**

- 3.1. It is important that the Fund assesses risks from all directions – not just purely financial risks. The Register aims to capture risks of an environmental, social and governance perspective as well. Some of the risks that address this in particular are:
  - 7. Market failure risk (Russia)
  - 15. Excessive fees
  - 53. Stranded assets
  - 20. ESG issues
  - 31. Reputational risk
- 3.2. Section 4 risks are all associated with Governance risks.

### **3.3. ENVIRONMENTAL IMPLICATIONS**

- 3.4. This risk register assesses, among other risks, those arising from investments in environmentally-polluting assets, and so can be said to be addressing the environmental implications of investments within the Pension Fund.

### **4. FINANCE COMMENTS OF THE EXECUTIVE DIRECTOR CORPORATE SERVICES**

- 4.1. The finance comments of the Executive Director Corporate Services are contained within the report.

### **5. COMMENTS OF THE BOROUGH SOLICITOR**

- 5.1. Under Section 249A(5) and s249B of the Pensions Act 2004 the administering authority must establish and operate adequate internal controls. The risk register is required to ensure the safe custody and security of the assets of the scheme.

### **6. APPENDICES**

#### **Appendix 1 – Risk Register**
